

XM Radio is one of the greatest things to come about as of late. It provides high quality audio of every genre, 90% of which would never be available to myself in my local area. When travelling, the traffic and weather are wonderful to have, especially when I am unfamiliar with the area and do not know what radio stations are in the area. Oftentimes, traffic and weather is the only local info I care to know about, and it is very easy to find the info I need with my XM Radio. I pay for a service which they do an excellent job of providing. Please do not take away anything away from my XM Radio service.
